

The Natural Strengths of Rockfon Stone Wool Ceilings

By releasing the natural power of stone, Rockfon's ceiling tiles and panels create beautiful, comfortable and safe spaces. Produced from naturally occurring volcanic rock, stone wool provides unique benefits that make it a high-performing solution for commercial ceilings.

Rockfon stone wool products are GREENGUARD Gold certified, mindful MATERIALS, have Class A Fire Performance, and come with a 30-year warranty.

High Acoustic Absorption

Typically, when noise hits hard reflective surfaces, the loudness in the room increases. However, stone wool's composition is highly sound absorptive, meaning it helps create a quieter and more comfortable environment.

Class A Fire Performance

As a non-combustible material, stone wool resists up to 2,150°F and does not produce significant smoke. With Class A Fire Performance, Rockfon stone wool tiles make a meaningful contribution to the fire safety of a building, ultimately keeping occupants safe.

Humidity and Moisture Resistance

Due to the fact stone wool cannot absorb water or hold moisture, Rockfon ceiling tiles will not sag or fall out of the grid. They maintain their high performance for the life of the building, no matter how humid the climate.

Indoor Environment

Many of Rockfon stone wool acoustic solutions are GREENGUARD Gold certified and meet the State of California's Department of Public Health Services Standard Practice for Specification Section 01350 (California Section 01350) for testing chemical emissions.

Aesthetics

Offering complete design freedom, stone wool tiles and panels deliver exceptional surface smoothness for modern design. Rockfon ceiling solutions are available with concealed, semi-concealed and visible edges in various colors, shapes and sizes.

Sustainability

Our ceiling tiles are comprised of basalt rock, a resource available in nature in limitless supply, in combination with up to 53% recycled content.

Hygiene

Made of water-repellent stone wool, Rockfon ceiling tiles have no nutritional value and therefore provide no sustenance to harmful microorganisms.

Cleanability

Rockfon ceilings can be vacuum cleaned and select product finishes allow for cleaning with a damp cloth and even steam cleaning. Additionally, our medical range is designed to allow cleaning with diluted disinfectants.

Installation

Installing Rockfon ceiling tiles and panels is quick and simple. Their lightweight stone wool core makes them installer-friendly—easy to transport, handle, cut and mount.
