

# 7 STEPS

## to Cultivate an Inclusive Classroom Environment

Disability is one of the most serious barriers to education across the globe. To assist in actively building a diverse, equitable, and inclusive classroom, we have created a short design guide where every child feels welcomed, valued, and heard.

1

### EQUAL ACCESSIBILITY

Install facilities, such as ramps, handrails, elevators, and ensure sufficient space for accessibility to places.

### GOOD ACOUSTICS

Install acoustic solutions to improve speech clarity and decrease distractions, while encourage conversation and collaboration.

2

3

### NATURAL LIGHT

Use windows, skylights, clear doors, mirrors, reflective surfaces, to promote quantity and distribution of daylight.

### COMFORTABLE TEMPERATURE

The classroom temperature should be between 20°C and 25 °C to optimise comfort and help children focus.

4

5

### HIGH AIR QUALITY

Use air purifiers, ventilation systems, grow plants that remove toxins, and sort and remove harmful building materials.

### VISUAL TRANSPARENCY

Use glass partitions to create visual interconnectedness and aid visual navigation, to make children feel safe and belonged.

6

7

### ADVANCED EQUIPMENT

Enable children greater accessibilities to content and more streamlined communication, increase engagement, and more personalised experiences.
