

ROCKFON® Drywall Grid

Drywall suspension systems that offer structural integrity and simplify installation.

Whether your ceiling is curved or flat, we offer a complete, easy-to-install drywall suspension system for all your needs. From different types of grids to perimeter trims and accessories – our sustainable solutions meet stringent building codes, saving you time and money during installation. Plus, they are backed by a top-of-the-line 40-year limited product warranty.

FLAT GRID

FIRE RATED AND NON-FIRE RATED DRYWALL SYSTEM

- Precise transition between acoustical and drywall ceilings
- Reduce on-site labor costs by eliminating black iron and hat channel
- Ideal for hospital corridors, retail lobbies and multi-family residential high rises
- Complies with a variety of UL fire-resistant designs
- Meets ASTM C645 and ASTM C754

CURVED GRID

RADIUS DRYWALL CEILING SUSPENSION SYSTEM

- Specifically for convex and concave ceiling designs
- Pre-notched at 8" intervals for easy installation
- Ideal for worship centers, museums, auditoriums and office spaces
- Meets ASTM C645 and ASTM C754

“Compared to conventional cold rolled channel and drywall furring channel construction, the Chicago Metallic suspension system offers definite labor savings.”

- Karl Economy, Integrated Interiors

All ROCKFON drywall grid systems meet or surpass ASTM C645 and ASTM C754 specifications.

SpanFast™

CORRIDOR SPANNING DRYWALL SUSPENSION SYSTEM

- Reduce overall labor and material costs by maximizing hanger spacing distance to up to 7'
- Pre-notched wall track for easy installation
- Minimize job site waste by reducing packaging waste
- Maximize production in condos, hotels, suites, dorms, restrooms, town homes, multi-housing and closets
- Meets ASTM C635 for Heavy Duty Rating

G90

EXTERIOR GRADE DRYWALL GRID

- Provides superior performance in harsh conditions
- Can be used for exterior soffit applications
- Compatible with straight and curved Infinity™ trim systems
- Ideal for indoor and outdoor applications such as restaurant drive-thru areas, verandas, porches and indoor parking garages
- Meets ASTM Standard E1264-08
- 30 PSF exterior wind load UL tested

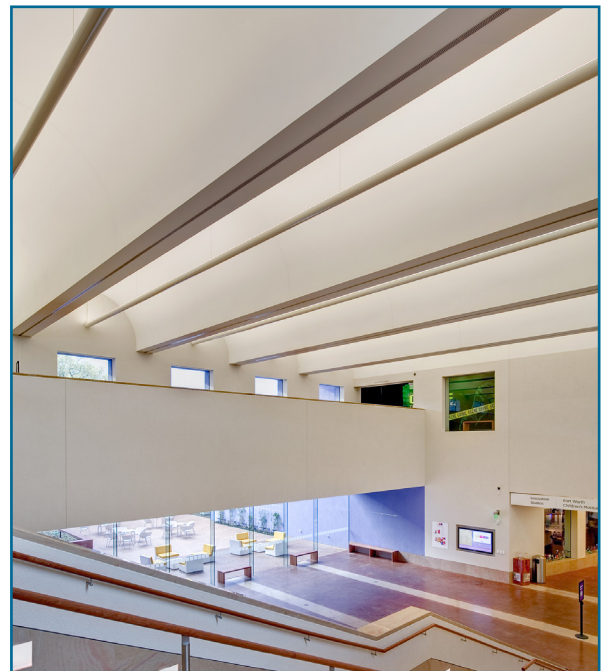

PROFILES/ACCESSORIES

INFINITY™ D, GRG ACCESS DOORS AND CLIPS

- Infinity™ D is available in three heights: 4", 6" and 8"
- Infinity™ D features a grooved taping flange
- Infinity™ D is easier to install compared to field framing
- GRG Access Doors allow for easier application than traditional bulky metal doors
- GRG Access Doors meet ASTM Standard E1264-08

ROCKFON drywall suspension products are sustainable, made from a minimum of 25% recycled content that is 100% locally recyclable.

Choosing a ROCKFON suspension system for your next project means selecting between a wide range of options for acoustical and specialty drywall ceiling systems. It's why we're the preferred choice of many contractors.
