EFFORTLESS ELEGANCE, UNLIMITED POSSIBILITIES.

Rockfon® Contour™

Unite form and function with our frameless acoustic baffles. Rockfon Contour effortlessly combines sleek, clean lines with acoustic excellence, creating an inviting atmosphere that enhances tranquility and boosts productivity.

Our elegant baffles offer fast and hassle-free installation, blending into any design as standalone pieces or paired with Rockfon stone wool tiles, panels, monolithic solutions, islands and metal ceilings. With the option of flat or curved edges, Contour sets a new standard for aesthetics and versatility.

Elegant Design Healthy Acoustics

Rockfon® Contour™ contributes to improving overall well-being within a space. With high sound absorption, powered by the inherent performance properties of stone wool, Contour plays a vital role in establishing a comfortable acoustic environment. By effectively absorbing sound, Contour stone wool baffles help create an acoustically healthy space where people can feel calm, focused, and productive. The smooth, matte white surface offers the right combination of direct versus indirect light, high light reflectance and diffusion, for a better overall lighting experience.

With its clean and sharp lines, Contour possesses precision and sophistication that can be added to any interior space. Contour's unique ability to mimic waves and shapes adds an element of artistry to ceiling designs, achieving a perfect balance between form and function. Available in different sizes, you can create the design to fit your vision.

Rockfon® Contour™ is ideal for spaces where traditional suspended ceilings pose technical limitations or don't meet aesthetic preference, such as skylights or tall windows. The Contour range is suitable for variety of spaces, from smaller rooms to open-plenum office buildings. Installers and contractors will appreciate the simple installation process.

Performance

The inherent high acoustic performance of stone wool enables Rockfon® Contour™ to help foster healthy acoustic environments. Surface: smooth, matte white fleece. Edge: matte white square edge. Shapes: 4 rectangular shapes and 3 wave shapes. 2 Suspension points integrated in the baffle. UL GREENGUARD certified for low chemical emissions to support overall healthy indoor air quality.

Design

- Design a statement ceiling by clean, sleek or curved lines in different dimensions.
- Use as a standalone solution or in combination with an existing acoustic ceiling.
- Ideal in rooms where traditional suspended ceilings aren't possible or aesthetically unappealing (e.g. where skylights or tall windows are installed).
- Quick and easy installation with Rockfon suspension system.
